

SELVA KISHORE C

B.E. Computer Science & Engineering | AI/ML | Full-Stack Development

6374836438 | selvakishore2020@gmail.com | Portfolio: rkcodes-ai.github.io/selva-kishore-portfolio/

linkedin.com/in/selva-kishore-c-733520419 | github.com/rkcodes-ai

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate specializing in AI/ML systems, particularly multi-agent architectures and document intelligence (OCR + LLM evaluation pipelines). Experienced across the full stack — from React frontends to FastAPI backends — with hands-on work in agent orchestration, automated evaluation, and offline/resilient communication systems. Focused on building practical, scalable AI applications from prototype to working demo.

TECHNICAL SKILLS

Programming:

Python, Java, JavaScript, C/C++

Frontend / Backend: React, HTML, CSS | FastAPI, Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB

AI/ML: Machine Learning, Generative AI, LLMs, NLP, OCR, Multi-Agent Systems

Tools: Git, GitHub, Docker, Linux, VS Code

EDUCATION

B.E. Computer Science and Engineering — Sri Shakthi Institute of Engineering and Technology

2024 – 2028 | CGPA: 7.6/10

PROJECTS

IntelliGrade — AI Answer Script Evaluation System [Month Year – Month Year]

Python | FastAPI | React | PostgreSQL | OCR | AI/ML | github.com/rkcodes-ai/[repo-name]

- Built an AI-powered platform automating answer-script processing and evaluation, covering document upload, OCR-based question extraction, and model-assisted answer evaluation.
- Designed the full workflow — answer-script upload → OCR → question extraction → AI evaluation → review — reducing manual grading effort for [X]+ scripts in testing. [Add real figure]
- Implemented authentication, role-based access control (RBAC), and audit logging to support multi-tenant use across institutions.

AITOOLS — Multi-Agent AI Collaboration & Orchestration Platform [Month Year – Month Year]

Node.js | React | AI/LLMs | Multi-Agent Architecture | github.com/rkcodes-ai/[repo-name]

- Developed a platform enabling specialized AI agents to collaborate on complex, multi-step tasks through coordinated workflows.
- Designed agent orchestration, task coordination, workflow execution, and inter-agent communication, supporting [N] concurrent agent roles. [Add real figure]
- Built scalable components for multi-agent interaction and automated task execution, reducing manual task-routing overhead.

DisasterMesh — Offline Emergency Communication System [Month Year – Month Year]

Mobile | BLE | Mesh Networking | github.com/rkcodes-ai/[repo-name]

- Designed an offline-first communication system for emergency scenarios where conventional networks are unavailable.
- Implemented BLE GATT-based packet transport and hybrid mesh communication to enable resilient, multi-hop message delivery across [N] devices in testing. [Add real figure]
- Built the system around decentralized communication and disaster-response requirements, prioritizing reliability over throughput.

Emergency Route Analyzer — AI-Enhanced Emergency Route Decision Support System [Month Year – Month Year]

Python | AI/ML | Data Science | github.com/rkcodes-ai/[repo-name]

- Developed a decision-support system applying data-driven route analysis to support efficient emergency ambulance routing.
- Built a system to assist real-time decision-making under changing emergency and road conditions, evaluated against [N] simulated scenarios. [Add real figure]

CERTIFICATIONS & WORKSHOPS

Applications of Artificial Intelligence in the Digital Era

The Institution of Engineers (India), Coimbatore Local Centre — August 2026

LEADERSHIP & EXTRACURRICULAR

- [Add hackathons, open-source contributions, coding-club roles, or competitive programming profiles — e.g., LeetCode/Codeforces handle, hackathon placements]
- [Add any team or leadership experience, even informal — project lead, peer mentoring, club activities]
